QR code
scan alert

A QR code that alerts staff for dirty tables.

A student is eating lunch in the dining hall. He finishes his food and then scans the QR code on the table. This alerts the dining staff, and he comes and cleans the table.

The dining staff recieve an alert that there is a dirty table.
He then goes and wipes the table.

The dining staff receives an alert that there is a dirty table. The staff then cleans the table so that the guest can eat.
